

## ■ Description

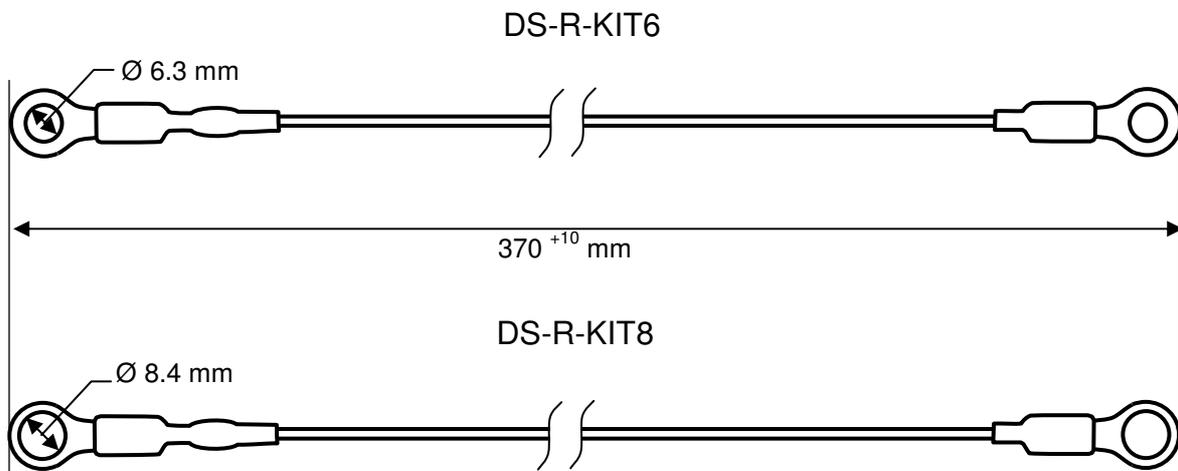

The resistor kits shall be used to avoid the problem of wrong “charger failure” indications of the VX-2000DS caused by low charging currents. They consist of a resistor that bypasses approx. 3 mA current from the batteries.

only required for VX-2000DS below serial no. 16A...

## ■ Specifications

	DS-R-KIT6	DS-R-KIT8
Resistance	3.9 kohm	
Max. power	100 mW	
Length	370 mm <sup>+10mm</sup>	
Applicable screws	M6	M8
weight		
Kit	Each kit consists of 2 cables with resistor
