

Avigilon AI Appliance 2X

Enhance your security with Server-side Analytics and Generative AI

Enhance site security and incident response capabilities with advanced video analytics with Avigilon AI Appliance 2X, a companion appliance to your Network Video Recorder. The AIA2X is powered by Generative AI, allows you to create custom alerts using simple natural language.

Server-side analytics

Enable Object Detection, Appearance Search, Facial Recognition and Occupancy Counting on existing non-analytic cameras.

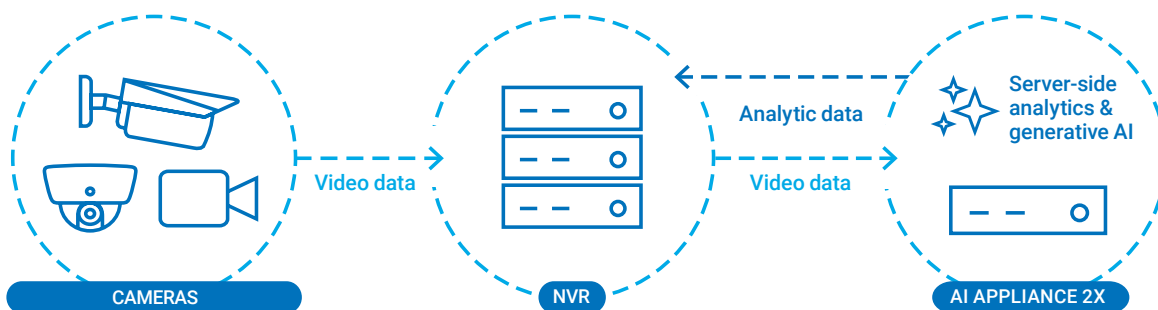

Turnkey deployment

A managed solution purpose-built for security and IT teams with easy setup and remote firmware updates for secure operation.

On-premise Generative AI

Going beyond people and vehicle detection. Identify specific events, from spills to complex object relationships, to enhance operational awareness.
